

Password recovery email in Glow

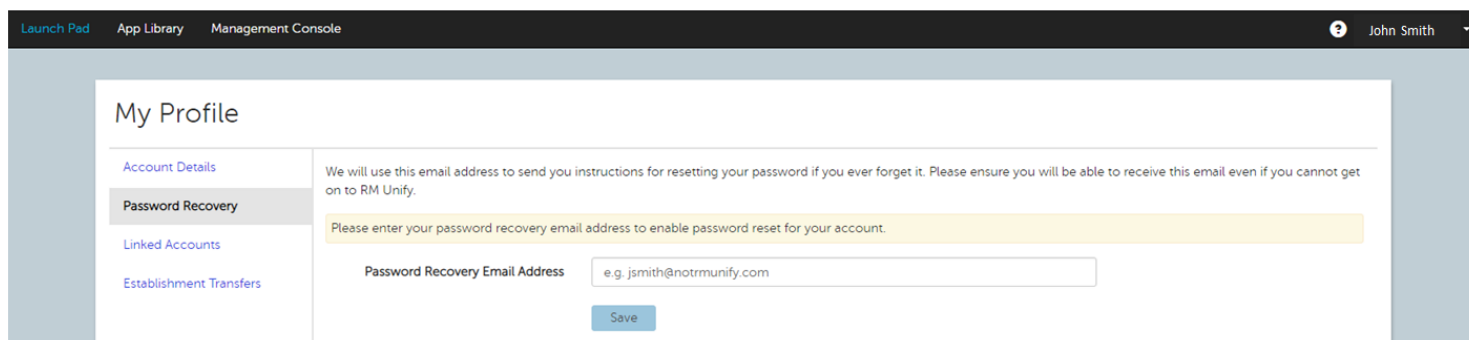

We all can forget our Glow password. Because of this, it is really useful to have a password recovery email in place in your Glow Profile so you can reset it yourself whenever you need to. Here is how you add it to your Glow account.

Log into Glow as normal.

Click on the drop-down menu to the right of your name. Choose **My Profile**

Next choose **Password Recovery** and then add an email address you can access easily. Primary students could ask their parent or guardian to add one.

Once you have done this if you have forgotten your password in Glow you click on **Forgotten your password?** under the **Sign In** button. This sends an email to the email address you added, allowing you to reset your password.
